Accounting - Multi-currency and Multi-level Sales Tax
Fitrix ERP Accounting Module

"The Fitrix solution was very feature-rich out of the box and its built-in flexibility and extensibility allowed us to do things with it that no software package we saw for any amount of money would have let us do."

Senior Executive
Mid-Sized Commercial Equipment Manufacturer/Distributor

In today's international business market, dealing with many different currencies has become a daily fact of life. The Fitrix Multicurrency Module makes handling different currencies within your accounting software easy. It automatically calculates exchange rates using either the vendor's/customer's currency or your home country currency and posts your realized gain or loss due to currency fluctuations to the General Ledger.

It also gives you the ability to input and track documents with foreign currencies in Fitrix Accounts Payable, Accounts Receivable, Order Processing and Purchasing modules, giving you the same flexibility of managing your international customer accounts as you have with your local ones. Whether you deal with one foreign customer, or hundreds of customers all over the world, Fitrix Multicurrency solves all of your currency conversion issues with ease.

Multi-currency and Multi-level Sales Tax

Easily convert foreign currencies into your home currency and book the gain/loss to General Ledger.
